

## Pre-announcement on price increases for Antioxidants in June 2026

Deae Partners,

We hope the message find you well. China Southern New Material remains committed to delivering high-quality Antioxidant products. We value the trust you place in us as your partner and strive to maintain exceptional service and reliability in meeting your needs.

However, due to the events (lasted for several months) occurring in Middle East, these events are resulting in substantial cost increases. Despite our efforts to manage this situation responsibly, we are not able to absorb the increasing cost.

Given the above, we are announcing a Pre-announcement on price increase of 10-15%(depending on the grade) for all Antioxidant products effective from 12 June or as contract terms allow, shall continue to closely monitor the situation and might make price adjustment if needed.

We continue to value your business and are committed to serving your Antioxidant products requirements. We understand that price changes may pose challenges, and we are here to assistyou during this change. Your account manager will contact you to provide you with more information.

Your sincerely,

*WANGCHAO*

Chief Executive Officer
