校友说 ALUMNI WANT TO SAY

I am a Korean who graduated from Bohai University. The memory of Bohai University still makes me smile. It was so wonderful everything, such as kind Chinese friends, teachers, delicious food and fun trips. Of course, studying is the most important thing. If I had studied in Korea, I could never have made this precious memory! I had a lot of fun in China and learned a lot.

KIM HEESUN

I graduated from Bohai University in Teaching Chinese as Second Language major in Master degree. I did three years of study in Bohai University and during this period, I was much attracted by the environment of Bohai University. It's a beautiful university with a small park where I used to go for a walk almost every day with friends. Talking of the environment I can't forget to mention the beauty brought by four seasons: the beautiful spring embellished by the blossoming flowers, the colorful autumn where trees are in yellow green and red, the summer when I can see the real green environment, the winter with snowflakes.

Besides, the time I spent there was a good occasion to make Chinese friends as well as friends of other countries. We spent best moments together, helped each other in academic and social life.

Teachers from our university are hospitable and have a great sense for education. Their duty is definitely to make sure that all the students are safe; never ceased to take care of us. Last, as my hobby is doing sports, there are enough places and playgrounds to do sports. I love Bohai university for almost every aspect especially the good education provided by the teachers.

NSABIMANA WILLY

With utmost pride, I would like to acknowledge the prestigious Bohai university in China that nurtured my intellectual growth. HOVE FARAI ANESU

It also presented an opportunity to make great friendships, that developed into a network and enhanced my interpersonal skills for life. With the grace of God and the pivotal role of my Alma Mater, where I am standing today in the career path is nothing short of Amazing!
